## EXPERIENCE

### Software Developer

GLOBAL VOICES

October 2019 – Present

In my current position my team and I maintain a legacy PHP application as we write and migrate to a new serverless based system using Lamdas written in C# and React.

- Learned the importance of refactoring code while fixing bugs
- Learned how to maintain code that wasn't written by me
- Took initiative and learned Ansible, Terraform, and Packer so we could migrate our legacy applications to AWS
- Created remote development environments for my team members
- Fixed security vulnerabilities found in a penetration test and then tracking down and reporting more. Helping the company secure a large contract.
- Quickly learning React from previous Javascript experience, so my team could deliver the minimum viable product as fast as possible.

### 1st Line ICT Support

GLASGOW CLYDE COLLEGE

December 2016 – August 2017

My role in this position was to work on tickets submitted by users and solve their computing related issues.

- I learned the importance of working in a team on large projects.
- I gained the knowledge to work with active directory
- I developed the ability to swiftly resolve users issues in a professional and friendly manner via phone, email, and face to face.
- I supported the networking team by confirming issues and restarting servers.
- I was chosen on multiple occasions to work at other campuses, when team members were absent: quickly integrating into their team and supporting the team on ongoing tickets.
- I spent downtime writing scripts in python to automate tedious tasks.

## EDUCATION

### Bsc(Hons) Computing (First Class)

GLASGOW CALEDONIAN UNIVERSITY

2017 – 2019

### HND Computing Science

GLASGOW CLYDE COLLEGE

2015 – 2017

### NQ Information Technology

GLASGOW CLYDE COLLEGE

2014 – 2015

## TECHNOLOGY SKILLS

### Programming Languages/Frameworks

- Java, Spring Boot, PHP, Golang, SQL
- React, Javascript, HTML, CSS

### DevOps Tools

- Terraform, Packer, Ansible, LXC/LXD

### Agile Tools
